

EMF Meter Instructions

Email us to get E-BOOK: The Everything Ghost Hunting Book(Email: Aftersale000@outlook.com)
If you have any questions, please feel free to contact us. Please don't forget that we offer 12 months warranty and lifetime technical support.

Please Note:

The display will be frozen if you press hold button or VPP button, About the explanation of button you can read instruction carefully.

When the reading more than 40V/m or $0.4\mu\text{T}$ (4 mG), it will be warning and the screen turns red because the radiation will be harmful to the human body if beyond that range. Please keep away these devices.

I . Introduction

Electromagnetic field meter (EMF meter) can test electric field radiation and magnetic field emission to reach the optimal test result. It is used to test and understand electromagnetic radiation in indoor and outdoor situation. It is equipped with a built-in electromagnetic radiation sensor, which can display the radiation value on LCD digital display after processing by the micro-control chip. You can make reasonable processing or taking effective prevention measures toward the electromagnetic radiation according to the test result.

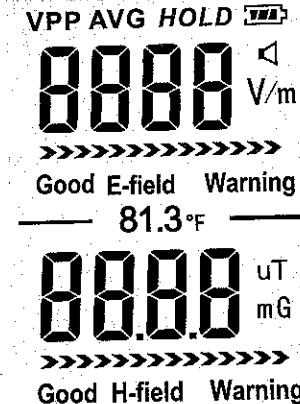

Strong electromagnetic radiation may and destroy original bioelectric current and biomagnetic field in human body and cause abnormality of the original electromagnetic field in human body. The elderly, children and the pregnant are susceptible to electromagnetic radiation.

Artificial electromagnetic radiation sources include all kinds of electric appliances and devices. By fair use of household appliances and taking reasonable precaution measures, electromagnetic radiation can be effectively prevented and reduced.

II. LCD display and part names

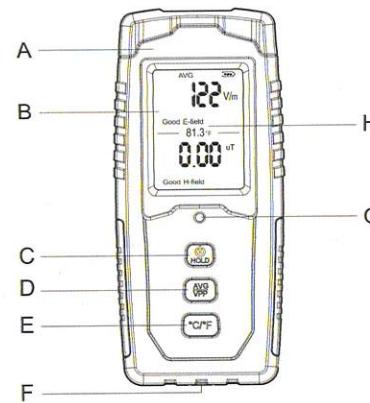

1.Full screen LCD: as shown in the figure below

2

III. Part names: as shown in the figure below

- A. Front sensing area
- B. LCD display
- C. Power On and Off / Hold button
- D. Average/Peak value mode switch button/
Buzzer switch
- E. Unit switch button
- F. Charging port
- G. Indicator light
- H. Temperature

IV. Operation Instruction

1. Turn on/Turn off

Short press power on "HOLD" button to turn on the detector, measured value of current electric field and magnetic field will be displayed on the screen. Long press power off button to turn off the detector. Detector will automatically shut down after 5 minutes without operation.

2. Measurement

Hold the instrument with hand, with front sensing area slowly approaching electromagnetic radiation source to be tested. **Note: Please do not cover the sensors at the top of the meter with your hand or other objects.** When the reading more than 40V/m or 0.4μT(4 mG), it will be warning and the screen turns red, the indicator light will flash and the buzzer will alarm.

Why does it alarm at 40V/m or 0.4μT?

The International Cancer Research Center has determined that magnetic pollution is a carcinogenic factor. When the magnetic field intensity in the living environment exceeds 0.4μT(4 mG), the incidence rate of childhood leukemia increases significantly. If the electric field is more than 40V/m or the magnetic field is more than 0.4μT(4 mG), these radiation will be harmful to the human body. So people can't stay in this environment for a long time.

3. Data HOLD

After startup, short press power on "HOLD" button, reading will be locked and "HOLD" icon shows on the screen; Press again to resume normal measurement, "HOLD" icon will not display.

4. Average / peak value mode

After startup, short press "AVG/VPP" button to switch between average value mode and peak value mode; average value mode displays "AVG" icon, peak value mode displays "VPP" icon.

Note: The date will not turn down in VPP mode.

5. Buzzer switch

After startup, long press "AVG/VPP" button to turn sound alarm on or off. If buzzer is turned on, volume icon will be displayed on screen.

6. Unit switch

After startup, short press "°C/°F" button to switch temperature units between °C and °F; long press "°C/°F" button to switch the magnetic field unit between μ T and mG.

7. Charging indication

When the battery is about to run out, please charge the instrument in time. After connected with a USB cable, the screen displays charging interface and stops measuring electromagnetic field.

V. Range of application

Electromagnetic radiation monitoring: House and apartment, office, outdoor and industrial sites;
Electromagnetic radiation test: Mobile phone, computer, TV set, refrigerator and high voltage cable radiation test;
Radiation protection product test: Test effects of radiation-proof clothes, radiation-proof film and other prevention articles.

VI. Technical parameters

	AC Electric field	Magnetic field
Unit	V/m	μ T/mG
Range	1V/m-199V/m	0.01-99.99 μ T/0.1-999.99mG
Resolution	1V/m	0.01 μ T/0.1mG
Alarm threshold	40V/m	0.4 μ T/4mG
Measurement bandwidth		5Hz-3500MHz
Sampling time		About 0.4 second
Measurement mode		Dual mode at the same time
Operation temperature		0°C-50°C
Operation humidity		Relative humidity below 80%
Working voltage		3.7V
Power		3.7V lithium battery

VII. Protecting Yourself from Radiation

Radiation is part of our life. Time, distance, and shielding actions minimize your exposure to radiation in much the same way as they would to protect you against overexposure to the sun. You can also reduce radiation damage to your body based on the following knowledge.

- 1) Reduce time spent using electronic products.
- 2) When using electronic products, try to stay away from them.
- 3) If you work in front of the computer for a long time, you can grow plants, such as cacti.
- 4) Drink more water and eat more fruits to supplement vitamin A and C.
- 5) Using some anti-radiation products can effectively prevent the pollution and radiation of the environment.

User Manual

Headlamp-TG-T069

Using Note

Dear customer,

Thank you for purchasing our headlamps.
Please read all the information contained in this user's guide carefully,
and keep it in a safe place and pass it to other users if necessary.

1. Please don't direct the light into people's eyes, the strong light will cause damage to the eyes, especially children.
2. Do not disassemble the product, so as to avoid damage to the lamp components.
3. Please do not soak or immerse it into water. It has a waterproof function to resist rain or water splash.
4. Please keep it away from flammable materials while charging.
5. This TG-T069 headlamp should charge with standard mobile phone charge or 5v power bank, any arbitrarily non-standard charger might affect battery using life, even safety accident.
6. If you use the headlamp for a long time, it may be a little hotter. Because its main material is aluminum and ABS.

If you have any questions or are not satisfied with the purchase, please contact our official store, we will provide you with satisfactory after-sales service.

Product Structure

1. Product Description

1.1 Product Advantages:

- TG-T669 mini sensor headlamp is designed for convenient indoor and outdoor activities, such as camping, hiking, emergency usage, etc.
- TG-T669 headlamp has a brand new sensor mode, two tiny sensor bulbs can detect hand waving to turn on/off the light, smart and sensitive. At the same time, it has added a function that is long press turn off the power, which help you turn on or off the light easier.
- The main bulb adopts LED-XPG lamp bead, which is ultra bright but low consumption.
- Its sealing structure is IPX4 waterproof rating, which can easily resist rain/water splash. (Don't soak or immerse it into water)
- Infrared sensor mode, easily to control the light by hand waving.
- The light has white light and red light, white light, red light night running warning, or help red light signal.
- It is easy to charge with built-in rechargeable polymer lithium battery.
- If adopts universal Android mini charging interface, which also works well with 5v power bank.
- The Battery indicator can control battery usage at any time.

2.2-Angle Adjustment

You can control the direction of the light by adjusting the angle of the headlamp, which can meet your lighting needs in different environments. It can rotate up to 60°.

Please don't over-rotate.

2.3-Charging Method

Charging Indicator: When charging, the blue light will flash; When fully charged, blue light will stop flashing and keep on.
Charging Status: 4 levels: 25-50-75-100%

Charging Time: 3-4 hours

The headlamp should charge with standard mobile phone charge or 5V power supply. You can choose from a variety of charging methods, such as laptop charging, charging plug, charging treasure, car charger, etc.

Special Note:

1. Please keep it away from flammable materials while charging.
2. The headlamp should charge with standard mobile phone charge or 5V power bank, any arbitrarily non-standard charger cable will effect battery using life.
3. Please do not overcharge to avoid reducing battery life.

1.2-Product Specification:

Product model: TG-T069
Lamp type: LED-XP-G
Product size: 65*40*26mm/2.55*1.57*1.02inch
Product weight: 60g/2.11 OZ. (single headlamp)
Product mode: 8 modes
Waterproof Level: IPX4
Product material: ABS
Power supply method: Built-in rechargeable battery
Charging method: USB charging
Charging Time: 3-4 H
Using Time: 4-8H

2. Product Usage Guidelines

2.1-8 Working Modes

LED Key Light Mode

- ① First Press, turn on the main strong beam.
- ② Second Press, turn on the main weak beam.
- ③ Third press, turn on the side strong beam.
- ④ Fourth press, turn on the side weak beam.
- ⑤ Fifth press, turn on the red beam.
- ⑥ Sixth press, turn on the SOS red strobe.
- ⑦ Seventh press, turn off the key light mode.

Sensor Light Mode

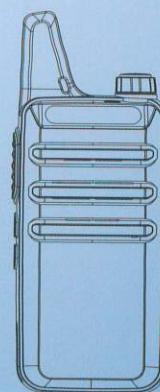

- ① First Press, turn on the Main strong beam.
- ② Second Press, turn on the side strong beam.
- ③ Third press, turn off the sensor mode.

In any mode, if you press and hold the key mode switch for 2 seconds, you can directly turn off the power.

RETEVIS
Two Way Radio

RT22

USER'S MANUAL

- Small but Powerful
- Slim, Fairly durable
- Use out of the box
- Hands Free

(EN)

WARNINGS

Product safety and RF Exposure for two way radio:

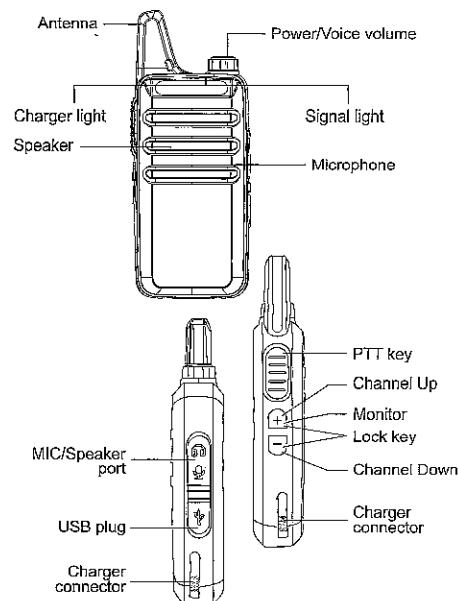

Before using this two way radio, please read the manual which contains important operating instructions for safe usage, RF Energy Awareness, control information and operational instructions for compliance with RF Energy Exposure limits in applicable national and international standards, and also read the operational instructions for safe use.

RETEVIS

◇◇ Get Acquainted

- The battery is not charged in a factory. Please charge the battery before initial use or after long time storage.
- Repeat charging and discharging the battery 2 or 3 times and the battery would reach its maximum capacity, please replace or charge the battery when it is in low power.
- The quick consume of the power after normal charge shows exhaustion of the battery. Please contact your dealer and buy new approved battery.

◇◇ Function Description

- **Time-out-timer**
To prevent accidental transmissions and save battery life, the radio emits a continuous warning tone and stops transmitting if you press the PTT button for more than 10 continuous seconds.
- **Battery Saving**
The battery-saving function would be on automatically without signal receiving or operation over 10 seconds. When the signal is received or with the operation, the radio would switch to normal mode.
- **Low battery Alert**
If the battery is low on your radio, an audible alert tone "please Charge" alerts you during transmit or receive mode.
- **Monitor**
Press and hold "+" button for three seconds to enter Monitor mode and listen for weak signals on the current channel.

RETEVIS

- **QT and DQT**

This function is mainly used to avoid irrelative calling in a certain channel. With this function, users can receive calls in corresponding channels only with the same QT/DQT.

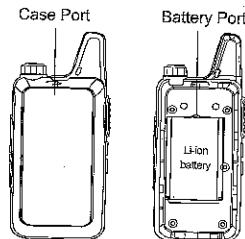

- **VOX**

VOX is a function that when the transmission is initiated by speaking into the microphone of the radio instead of pushing the PTT button. To activate the VOX function, switch to channel 7 first, and turn off the radio. Press and hold "▲" button and turn on the radio will activate the VOX, repeat the operation to turn off the VOX.

- **Keylock**

To avoid accidentally changing your radio settings, When the radio is on standby, press the "+" and "-" keys at the same time, and it will broadcast a short beep tone, which means the channel up and down key is locked; Press the "+" and "-" keys at the same time again, and it will broadcast two short beep tones which means the channel up and down key is unlocked.

◇◇ Attaching & Removing

◇◇ Warnings

RF ENERGY EXPOSURE AND PRODUCT SAFETY GUIDE FOR PORTABLE TWO-WAY RADIOS

Before using this radio, read this guide which contains important operating instructions for safe usage and RF energy awareness and control for compliance with applicable standards and regulations.

This two-way radio uses electromagnetic energy in the radio frequency (RF) spectrum to provide communications between two or more users over a distance. RF energy, which when used improperly, can cause biological damage.

All Retevis two-way radios are designed, manufactured, and tested to ensure they meet government-established RF exposure levels. In addition, manufacturers also recommend specific operating instructions to users of two-way radios. These instructions are important because they inform users about RF energy exposure and provide simple procedures on how to control it.

Please refer to the following websites for more information on what RF energy exposure is and how to control your exposure to assure compliance with established RF exposure limits:
<http://www.who.int/en/>

Local Government Regulations

When two-way radios are used as a consequence of employment, the Local Government Regulations requires users to be fully aware of and able to control their exposure to meet occupational requirements. Exposure awareness can be facilitated by the use of a product label directing users to specific user awareness information. Your Retevis two-way radio has a RF Exposure Product Label. Also, your Retevis user manual, or separate safety booklet includes information and

RETEVIS

operating instructions required to control your RF exposure and to satisfy compliance requirements.

Radio License

Governments keep the radios in classification, business two-way radios operate on radio frequencies that are regulated by the local radio management departments (FCC, ISED, OFCOM, ANFR, BFTK, Bundesnetzagentur...). To transmit on these frequencies, you are required to have a license issued by them. The detailed classification and the use of your two radios, please contact the local government radio management departments.

Use of this radio outside the country where it was intended to be distributed is subject to government regulations and may be prohibited.

Unauthorized modification and adjustment

Changes or modifications not expressly approved by the party responsible for compliance may void the user's authority granted by the local government radio management departments to operate this radio and should not be made. To comply with the corresponding requirements, transmitter adjustments should be made only by or under the supervision of a person certified as technically qualified to perform transmitter maintenance and repairs in the private land mobile and fixed services as certified by an organization representative of the user of those services.

Replacement of any transmitter component (crystal, semiconductor, etc.) not authorized by the local government radio management departments equipment authorization for this radio could violate the rules.

FCC Requirements:

This device complies with part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference. (Licensed radios are applicable);

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (Other devices are applicable)

RETEVIS

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

CE Requirements:

- (Simple EU declaration of conformity) Shenzhen Retevis Technology Co., Ltd. declares that the radio equipment type is in compliance with the essential requirements and other relevant provisions of RED Directive 2014/53/EU and the ROHS Directive 2011/65/EU and the WEEE Directive 2012/19/EU; the full text of the EU declaration of conformity is available at the following internet address: www.retevis.com.

• Restriction Information

This product can be used in EU countries and regions, including: Belgium (BE), Bulgaria (BG), Czech Republic (CZ), Denmark (DK), Germany (DE), Estonia (EE), Ireland (IE), Greece (EL), Spain (ES), France (FR), Croatia (HR), Italy (IT), Cyprus (CY), Latvia (LV), Lithuania (LT), Luxembourg (LU), Hungary (HU), Malta (MT), Netherlands (NL), Austria (AT), Poland (PL), Portugal (PT), Romania (RO), Slovenia (SI), Slovakia (SK), Finland (FI), Sweden (SE) and United Kingdom (UK). For the warning information of the frequency restriction, please refer to the package or manual section.

• Disposal

The crossed-out wheeled-bin symbol on your product, literature, or packaging reminds you that in the European Union, all

RETEVIS

electrical and electronic products, batteries, and accumulators (rechargeable batteries) must be taken to designated collection locations at the end of their working life. Do not dispose of these products as unsorted municipal waste. Dispose of them according to the laws in your area.

IC Requirements:**Licence-exempt radio apparatus**

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- (1) l'appareil ne doit pas produire de brouillage;
- (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

RF Exposure Information

- DO NOT operate the radio without a proper antenna attached, as this may damage the radio and may also cause you to exceed RF exposure limits. A proper antenna is the antenna supplied with this radio by the manufacturer or an antenna specifically authorized by the manufacturer for use with this radio, and the antenna gain shall not exceed the specified gain by the manufacturer declared.
- DO NOT transmit for more than 50% of total radio use time, more than 50% of the time can cause RF exposure compliance requirements to be exceeded.
- During transmissions, your radio generates RF energy that can

RETEVIS

possibly cause interference with other devices or systems. To avoid such interference, turn off the radio in areas where signs are posted to do so.

- DO NOT operate the transmitter in areas that are sensitive to electromagnetic radiation such as hospitals, aircraft, and blasting sites.
- Portable Device, this transmitter may operate with the antenna(s) documented in this filing in Push-to-Talk and body-worn configurations. RF exposure compliance is limited to the specific belt-clip and accessory configurations as documented in this filing and the separation distance between user and the device or its antenna shall be at least 2.5 cm.
- Mobile Device, during operation, the separation distance between user and the antenna subjects to actual regulations, this separation distance will ensure that there is sufficient distance from a properly installed externally-mounted antenna to satisfy the RF exposure requirements.
- Occupational/Controlled Radio, this radio is designed for and classified as "Occupational/Controlled Use Only", meaning it must be used only during the course of employment by individuals aware of the hazards, and the ways to minimize such hazards; NOT intended for use in a General population/uncontrolled environment.
- General population/uncontrolled Radio, this radio is designed for and classified as "General population/uncontrolled Use".

RF Exposure Compliance and Control Guidelines and Operating Instructions

To control your exposure and ensure compliance with the occupational/controlled environment exposure limits, always adhere to the following procedures.

Guidelines:

- User awareness instructions should accompany the device when transferred to other users.
- Do not use this device if the operational requirements described

RETEVIS

herein are not met.

Operating Instructions:

- Transmit no more than the rated duty factor of 50% of the time. To Transmit (Talk), push the Push to Talk (PTT) button. To receive calls (Listen), release the PTT button. Transmitting 50% of the time, or less, is important because the radio generates measurable RF energy exposure only when transmitting in terms of measuring for standards compliance.
- Transmit only when people outside the vehicle are at least the recommended minimum lateral distance away from a properly installed according to installation instructions, externally mounted antenna.
- When operating in front of the face, worn on the body, always place the radio in a Retevis approved clip, holder, holster, case, or body harness for this product. Using approved body-worn accessories is important because the use of Non-Retevis approved accessories may result in exposure levels, which exceed the IEEE/ICNIRP RF exposure limits.

Hand-held Mode

- Hold the radio in a vertical position with the microphone (and other parts of the radio including the antenna) at least 2.5 cm (one inch) away from the nose or lips. The antenna should be kept away from the eyes. Keeping the radio at a proper distance is important as RF exposure decreases with increasing distance from the antenna.

Phone Mode

- When placing or receiving a phone call, hold your radio product as you would a wireless telephone. Speak directly into the microphone.

Electromagnetic Interference/Compatibility

NOTE: Nearly every electronic device is susceptible to electromagnetic interference (EMI) if inadequately shielded, designed, or otherwise

RETEVIS

configured for electromagnetic compatibility.

Avoid Choking Hazard

Small Parts. Not for children under 3 years.

Turn off your radio power in the following conditions:

WARNING

- Turn off your radio before removing (installing) a battery or accessory or when charging battery.
- Turn off your radio when you are in a potentially hazardous environments: Near electrical blasting caps, in a blasting area, in explosive atmospheres (inflammable gas, dust particles, metallic powders, grain powders, etc.).
- Turn off your radio while taking on fuel or while parked at gasoline service stations.
- To avoid electromagnetic interference and/or compatibility conflicts
- Turn off your radio in any facility where posted notices instruct you to do so, hospitals or health care facilities (Pacemakers, Hearing Aids and Other Medical Devices) may be using equipment that is sensitive to external RF energy.
- Turn off your radio when on board an aircraft. Any use of a radio must be in accordance with applicable regulations per airline crew instructions.

Protect your hearing:

WARNING

- Use the lowest volume necessary to do your job.
- Turn up the volume only if you are in noisy surroundings.
- Turn down the volume before adding headset or earpiece.
- Limit the amount of time you use headsets or earpieces at high volume.

RETEVIS

- When using the radio without a headset or earpiece, do not place the radio's speaker directly against your ear
- Use careful with the earphone maybe possible excessive sound pressure from earphones and headphones can cause hearing loss

Note: Exposure to loud noises from any source for extended periods of time may temporarily or permanently affect your hearing. The louder the radio's volume, the less time is required before your hearing could be affected. Hearing damage from loud noise is sometimes undetectable at first and can have a cumulative effect.

Avoid Burns

Antennas

- Do not use any portable radio that has a damaged antenna. If a damaged antenna comes into contact with the skin when the radio is in use, a minor burn can result.
- Batteries (If appropriate)
- When the conductive material such as jewelry, keys or chains touch exposed terminals of the batteries, may complete an electrical circuit (short circuit the battery) and become hot to cause bodily injury such as burns. Exercise care in handling any battery, particularly when placing it inside a pocket, purse or other container with metal objects.
- Long transmission
- When the transceiver is used for long transmissions, the radiator and chassis will become hot.

Safety Operation

Forbid

- Do not use charger outdoors or in moist environments, use only in dry locations/conditions.
- Do not disassemble the charger, that may result in risk

RETEVIS

- of electrical shock or fire.
- Do not operate the charger if it has been broken or damaged in any way.
- Do not place a portable radio in the area over an air bag or in the air bag deployment area. The radio may be propelled with great force and cause serious injury to occupants of the vehicle when the air bag inflates.

To reduce risk,

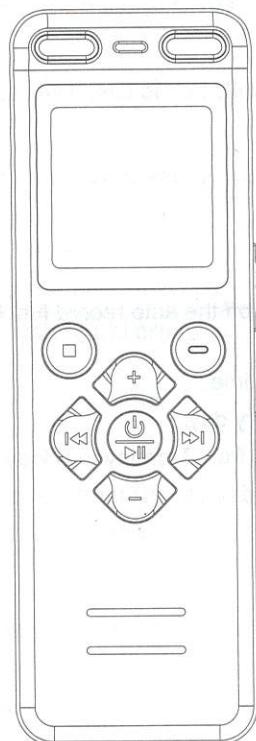

- Pull by the plug rather than the cord when disconnecting the charger.
- Unplug the charger from the AC outlet before attempting any maintenance or cleaning.
- Contact Retevis for assistance regarding repairs and service.
- The adapter shall be installed near the equipment and shall be easily accessible

Approved Accessories

- This radio meets the RF exposure guidelines when used with the Retevis accessories supplied or designated for the product. Use of other accessories may not ensure compliance with the RF exposure guidelines and may violate regulations.
- For a list of Retevis-approved accessories for your radio model, visit the following website: <http://www.Retevis.com>

Voice Record User Manual

V5

The original package comes film wrapped and has bar code information.

Package List

1 x Voice Recorder

1 x LINE IN Cable

1 x USB Cable (for data transfer and charging)

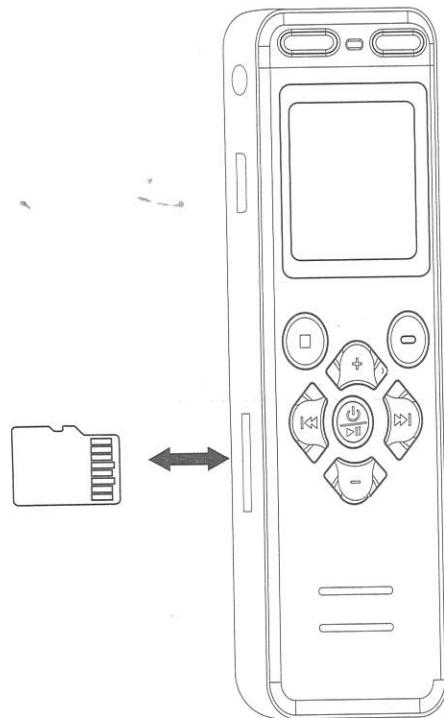

1 x VIP Card (customer support information)

Product Warranty

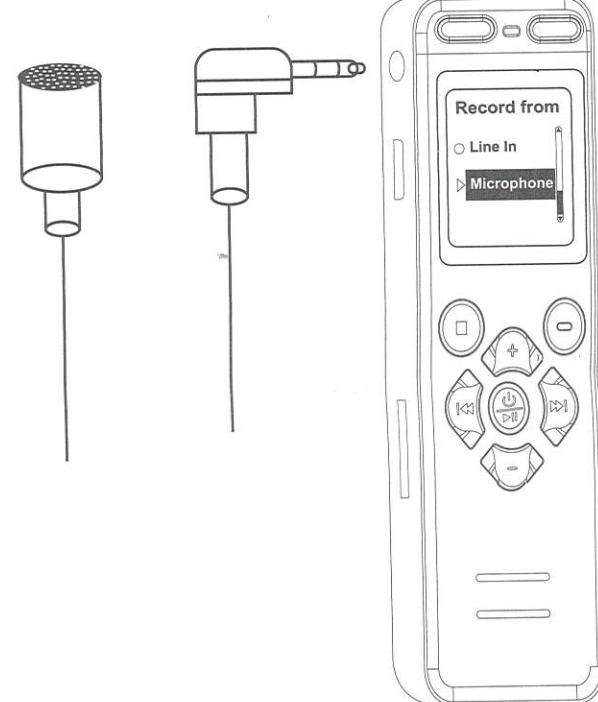

1 year warranty unless registered with VIP.

2

How to Insert TF Card

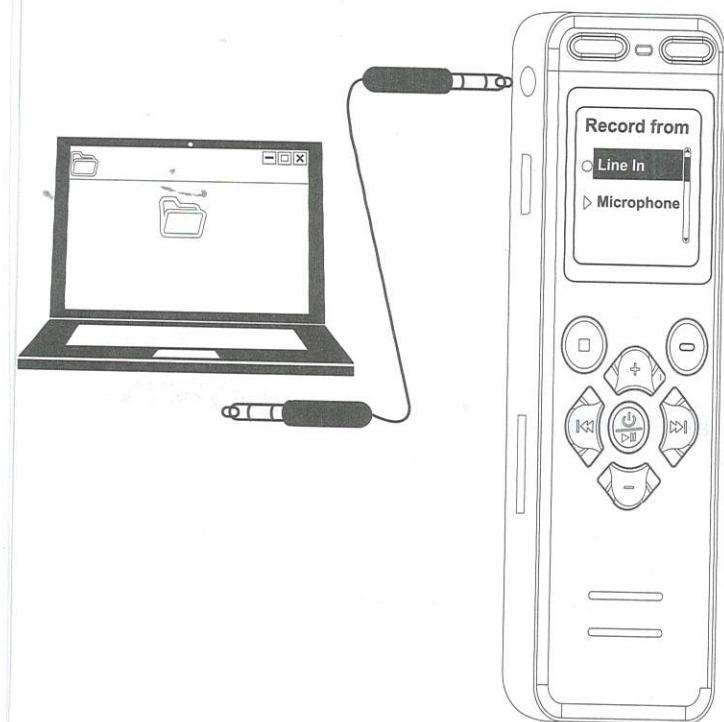

Check TF Card direction, correctly push in / out, like picture shows.

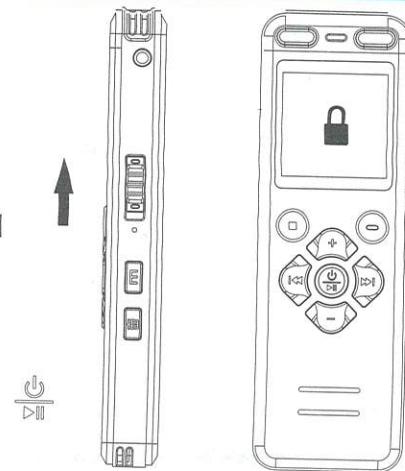

External MIC: insert external microphone, press REC, it will show like the picture, select microphone, and press PLAY button to confirm and start recording.

Unlock the device

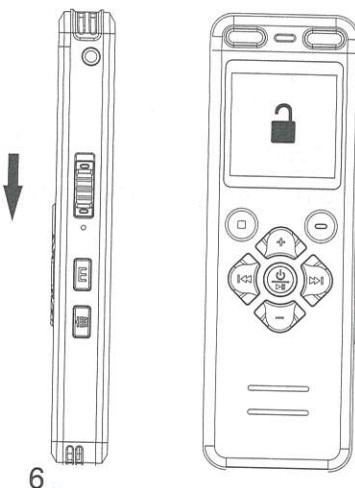

LINE IN: insert LINE-IN cord, press REC, it will show like the picture, select LINE IN, and press PLAY button to confirm and start recording.

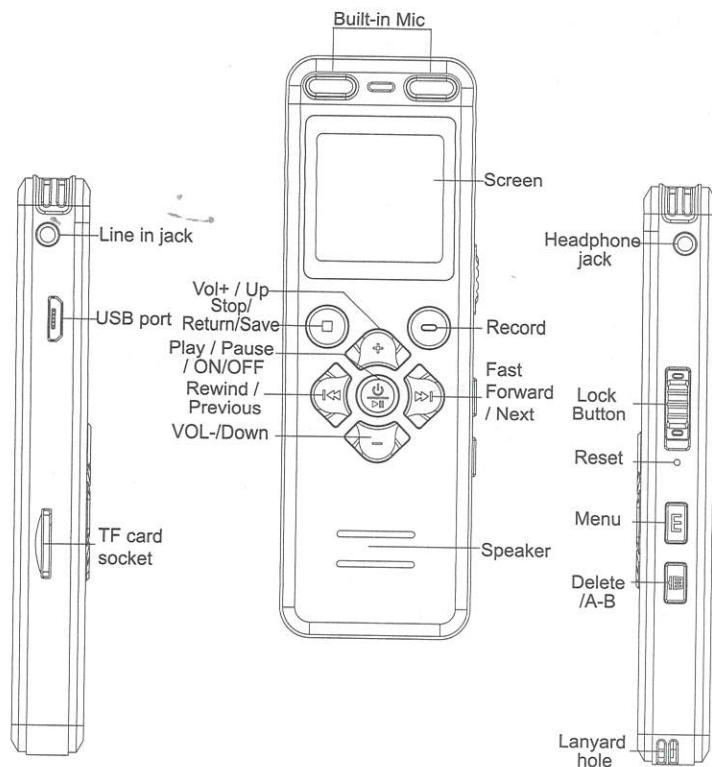

Device locked

Push down LOCK button, unlock

Product Sketch

Learn how to operate the buttons in the product sketch.

Built-in Mic: Captures the voice and records. Do not click on buttons when device is recording.

Earphone: You may plug in earphones to hear the playback.

LINE-IN: Connect for LINE IN cable / external microphone

USB: For charging or to download recordings to a computer.

PLAY/PAUSE: Play recordings or turn on/off the device

REC: Button for recording.

STOP: Save recording, stop playback.

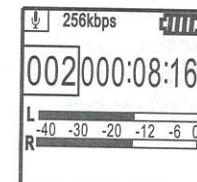

M: Menu options. Use up/down to select, use PLAY to confirm. Press Stop to return to main menu

UP/DOWN (+/-): Selects Menu Options. Adjust speaker volume when playback.

Speaker: Device has a built-in speaker. You can hear the playback without earphones.

REW/FF : Selects left/right, hold it for rewind / fast forward when playback

RESET: when device in error status, push RESET button quick to fix it

NO.	Function
1	Battery Bar (when battery bar is empty, battery needs recharging)
2	Length of Recording in minutes/seconds
3	Recording format & bit rate
4	Remaining Recording Time (remaining capacity)
5	Recording Status
6	L/R Channel meter
7	Total Recording File Count

Quick Start Guide

Turn ON device: Press PLAY button for two seconds to turn on the device.

Recording: press REC button to begin recording.

Save Recording: press STOP button to save recording

Delete Recording: press Menu button. Select -> Delete -> select Delete One. This deletes a single recording. To delete all files, Use +/- button to choose Delete All -> Select Yes -> Use PLAY button to confirm your choice.

QUICK Delete: by pressing PLAY button turn on the device, press REW/FF button to select a recording, and then press

the DEL button at device's right side, quickly delete the selected recording, or delete All recordings.

Play a Recording: by pressing PLAY button turn on the device, press REW/FF button to choose the recording you wish to hear -> press PLAY.

Play Next / Previous Recording: press the REW/FF button. Fast Forward / Rewind: press and hold the REW/FF button.

Important Notice for Using This Device

DOs

- Listen to a test file on the device to check sound levels.
- Backup data as frequently as possible.
- Charge the device via its USB cable to a computer or wall charger (charger input less than 5V 1A).
- When battery is low (battery bar empty), save recordings and recharge immediately.
- The device supports charging and recording at the same time.
- Remember to hit STOP and save your recording each time.
- Device won't make any noise during recording. It will flash the Record LED light (this function can be turned off).
- Keep this booklet for future reference.

- Contact customer service with Order ID or System Firmware Version Information, or Bar Code on the package for a more effective reply.
- **Register for VIP service within 30 days to receive effective customer service and extend your recorder's warranty to 18months.**

DON'Ts

- Do not scratch the recorder body.
- If typing or writing near the device while record function is on, it will capture the noise.
- Do not format the device unless the files have been backed up.
- Do not delete a file unless the file has been backed up.
- Do not press any buttons when device is connected to a computer.
- Do not use non-original micro USB cable to transfer data from device to computer. Not all micro USB cables support data transfer.
- Do not use the Voice Activated Function unless needed. It may not record some low decibel voice you want recorded.
- Do not pause the device for a long time, as the device will automatically shut down when there is no operation such as playing or recording.

Operational Explanations:

These instructions will say "hit" or "press and hold."

Hit: a short press of the button.

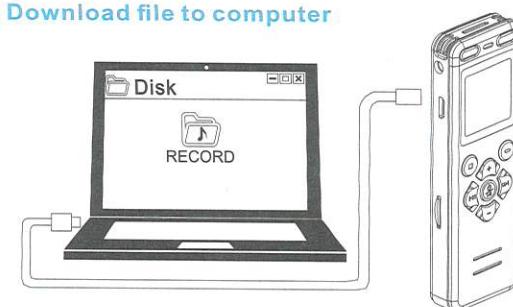

Press and hold: press the button a few seconds until the screen shows the information.

Basic Operation Guide

1) Charging the device

Use the USB cable provided. Connect to a computer, USB socket, or USB Adapter. The battery can be fully charged in 3 hours, single full charge can work up to 70 hours.

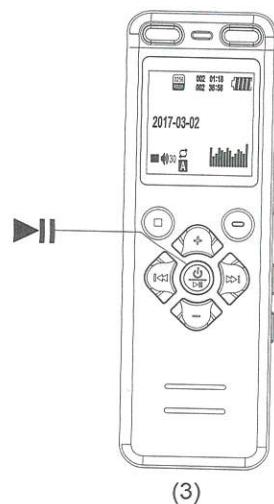

2) Download file to computer

Use the USB cable provided to connect to your computer. Find the file (36) on your computer. Drag & Drop or Copy and Paste the recordings from the recorder file to your computer and share with friends.

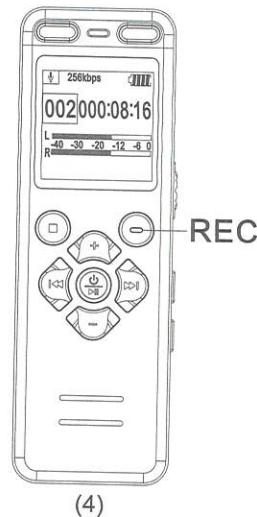

3) Turn on the recorder

Press PLAY button to turn ON/OFF the recording device.

4) Recording

Hit REC button to begin recording.
Press STOP to automatically save recording.

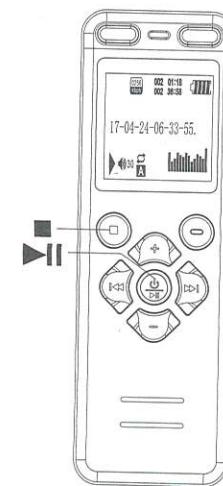

5) Pause / Resume Recording

During recording, hit PLAY button to pause recording.
Hit PLAY button again to resume recording.

6) Play Recording

Once you have saved a recording, hit PLAY button and play back what was just recorded.

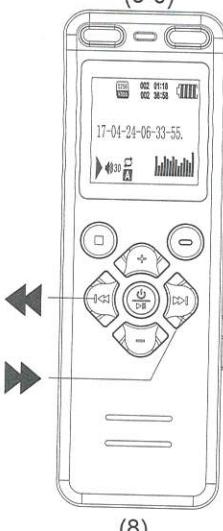

7) Adjust Speaker Volume

During playback, use + / - to adjust speaker volume.

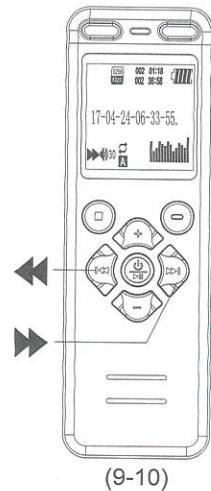

8) Fast Forward / Rewind

During playback, press and hold FF to use fast forward.
During playback, press and hold REW to rewind.

9) Previous / Next

Tap REW or FF to select, move to previous / next recording file (or music track).

(9-10)

10) Play Music (use as MP3 Player)

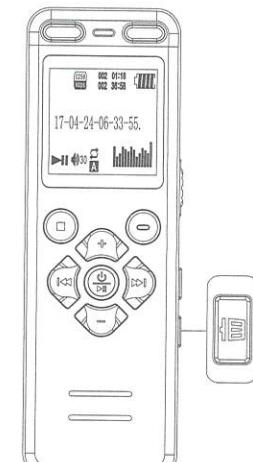

Attach device to computer. Transfer music file from computer to recorder. Detach device from computer and turn on.

Press down MENU button and switch to music folder.

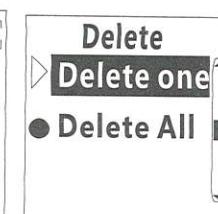

Note: the songs do not put inside the RECORD folder, you could create a new folder for it.

11) Delete Recording

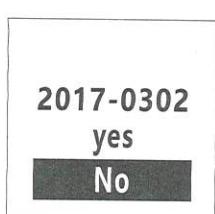

Turn on the device by pressing Play. Press REW/FF to select a file to delete -> press DEL button, directly enter delete option

(11)

(11)

Menu Options

The PLAY button works as OK/Confirm in menu options
