

**INSTRUCTION SHEET**

1. Your Cometron FirstScope 76 includes the preassembled base and optical tube, the finderscope assembly, two eyepieces and TheSkyX DVD-ROM astronomy software.

2. To install finderscope, remove nuts on side of tube, place bracket over threaded posts and replace the nuts.

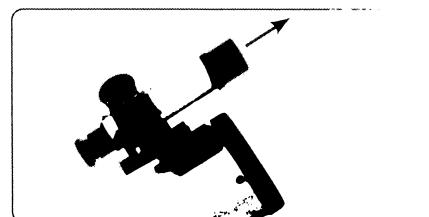

3. Loosen the thumbscrews on the focuser and remove focuser cap.

4. Insert the chrome barrel of the eyepiece into the focuser and secure with set screws.

5. Remove main telescope lens cap and caps on the finderscope.

6. Loosen the altitude lock nut by turning it clockwise and hold the bottom of the tube with your other hand.

7. Use the finderscope to roughly point your telescope at your target.

8. When you have your target in the field of view of the telescope eyepiece, tighten the altitude lock nut.

9. Focus your telescope by turning the two knobs under the eyepiece until you have a sharp image.
