

CANVAS

Getting set up for your first video:

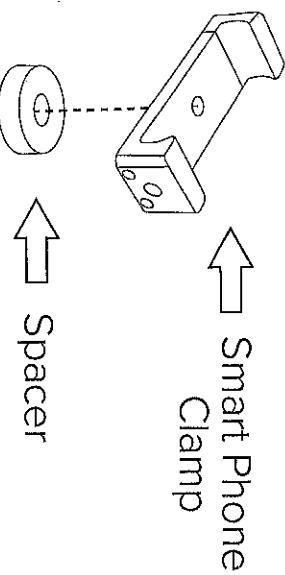

1. Insert stem of lamp into lamp base.

(Wood Base)

2. Install universal smart phone clamp.

(Canvas comes pre-installed for iPhone. Additional compatibility shown at right.)

(Desk Mount)

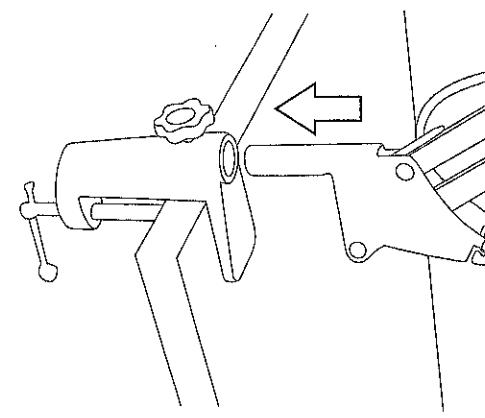

Smart phone compatibility:

Left Mounting Hole:
iPhone, Google Pixel,
Samsung Galaxy

Center Mounting Hole:

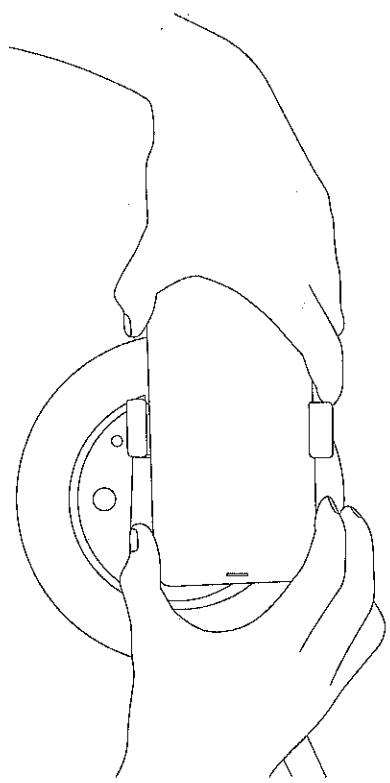

Motorola Moto,
OnePlus,
GoPro Session

Right Mounting Hole:
GoPro Hero, DJI OSMO
Action

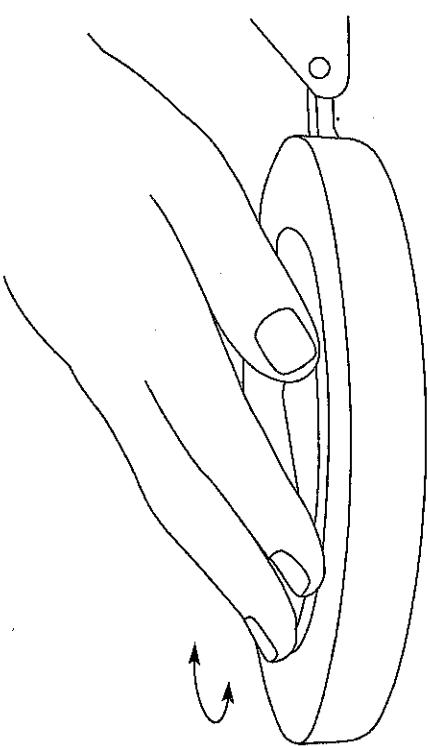

2. Insert Phone.

(Using two hands, hold lamp steady while pushing phone into clamp with thumbs.)

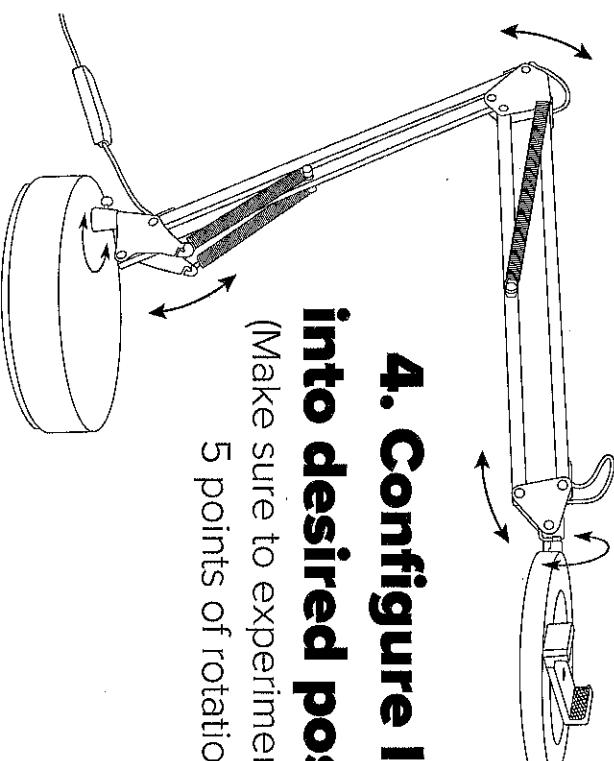

5. Loosen inner ring to adjust camera plate.

(Don't remove ring completely - just loosen enough to allow plate to spin.)

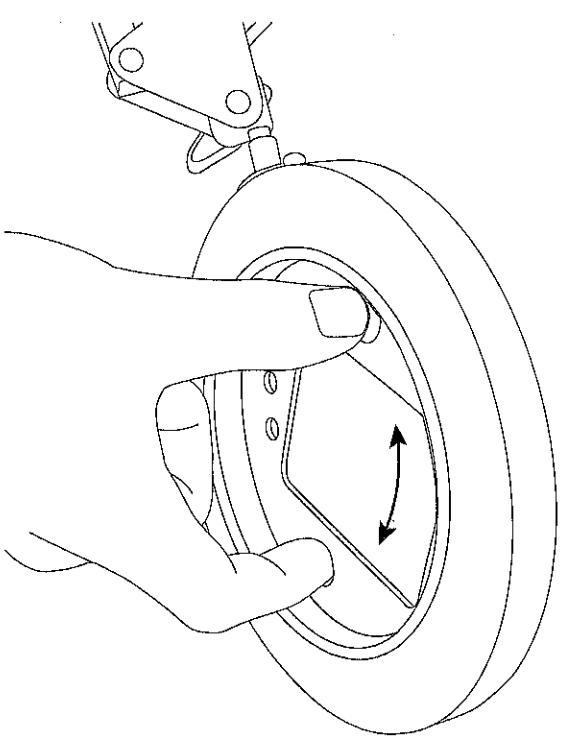

4. Configure lamp into desired position.

(Make sure to experiment with all 5 points of rotation!)

6. Rotate plate to desired orientation.

(When you're happy with camera angle, re-tighten inner ring to keep it from slipping.)

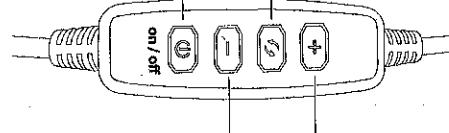

Three steps to dial in your lighting

Step 1 - Power light on and turn intensity all the way up.

Color Control
Intensity Control

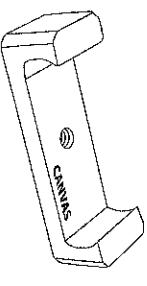

Power

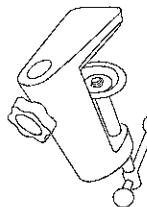

Step 2 - Match light color to your environment:
Blue - Use on sunny days close to windows.
White - Use on overcast days close to windows.
Yellow - Use at night or when working with indoor lighting.

Step 3 - Decrease intensity until light feels even.

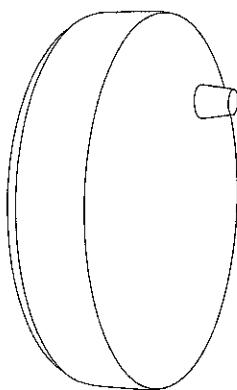

IN THE BOX:

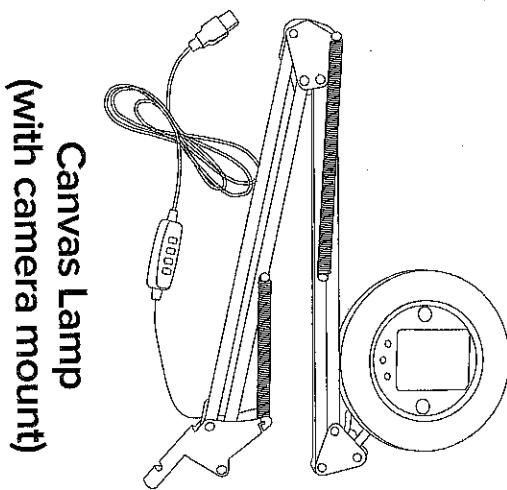

Universal Smart Phone Holder

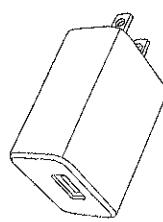

Desktop Lamp Clamp

Wooden Lamp Base (optional)

Canvas Lamp (with camera mount)

USB Wall Adapter

Other Odds and Ends:
screw, spacer, and a
sweet CANVAS sticker.
