

ROCKET BOOK EVERLAST

We designed the Everlast to be a reusable notebook that you can use again, and again, and again...

Important Tips

WRITING:

Only use Pilot FriXion pens and markers with the Everlast. You can find replacements and different styles and colors in stores everywhere.

To prevent smudging, allow 15 seconds for the FriXion ink to dry and physically bond to the page.

FriXion ink disappears at over 140°F / 60°C. If you leave the Everlast in a hot car, your writing may appear faded. To bring it back, pop it in the freezer for 20 minutes. Seriously.

ERASING:

Dampen a part of the included microfiber towel with water and use that portion to wipe the page. Then wipe it down with the dry portion of the towel to dry the page completely. Any towel will work, but microfiber ones work best.

Only write on pages that are completely dry. Writing on a damp page doesn't work well and it may damage the surface of the page. Bearing down very hard while writing can also permanently scratch the receptive coating of the pages.

For best performance, we suggest keeping Everlast pages wiped clean. Leaving FriXion ink on the page for over a month may make it more difficult to erase the ink completely.

IMPORTANT INFO:

Rocketbook also makes the Wave, another reusable notebook you erase in your microwave oven. The Everlast is NOT to be confused with the Wave -- please do NOT microwave your Everlast.

Only Use Pilot FriXion Pens

ROCKET BOOK

Prepare for launch

Download the app and start your journey at
everlast.getrocketbook.com

All systems go

Inside the app, set up your Rocket Symbols to create your organization system. There are seven symbols at the bottom of each page. Think of each symbol as a subject in your notebook.

For each symbol, select a cloud service and set a place inside that service.

Example: Student

- Journal sent to personal email
- "Chemistry" folder in Google Drive
- "History" folder in Google Drive
- "Biology" folder in Google Drive
- "English" folder in Google Drive
- "Math" folder in Google Drive
- "Shared Team" folder in Dropbox

Example: CEO of Rocketbook

- "Team Meetings" in Evernote
- "Customer Meetings" in Evernote
- "General Work" in Evernote
- "Ideas" folder in Dropbox
- Email to spouse
- Slack to #general channel
- Slack - prompt me for destination

Takeoff

When you mark a symbol on a page and then scan that page with the app, Rocketbook blasts those notes to the right place, instantly organized for you.

Rocketbook supports iCloud, Google Drive, Evernote, Dropbox, Box, Slack, iMessage, Microsoft OneDrive, Microsoft OneNote, and email.
